

strength | reliability | innovation

Protak membrane press adhesives have been specially developed for the production of vinyl wrapped doors. This range of single and two component cross linking adhesives satisfies the performance requirements for durability of surface and adhesion of BS6222 Part 3 1999 'Domestic Kitchen Equipment' as tested by FIRA.

Benefits

- Excellent heat resistance
- Reduced pressing times
- Perfect sprayability
- Produces a uniform surface finish, minimising the "orange peel effect"

Protak

Membrane Press Adhesives

■ Protak Universal

A universal, single component grade ideal for applying PVC materials to wood. Reactivation temperature is 60-80°C, enabling the product to be used on a range of different presses.

■ Protak Economic

Economic grade similar to MP/M. It is ideal for bonding vinyls to non-absorbent materials such as metal, pvc and plastic extrusion on raised profiles.

■ Protak Universal 2

A two-component version of Protak Universal.

■ Protak Economic

A two-component version of Protak Economic.
